

**AGRICULTURE INNOVATIONS**

The Allis-Chalmers no-til planter was recognized in 1993 as one of the 100 most important worldwide developments in agriculture.

- Assn. of Equipment Manufacturers/EMI

Premier edition of *No-Till Farmer*, Nov. 1972

**Nobody knows the ins and outs of NO-TIL farming better than ALLIS-CHALMERS...we pioneered it**

Back in 1966 we introduced the Allis-Chalmers No-Til Planting System. Today, more acres of no-tillage crops are put in with our planter than with all others. That says a lot about our planter farmers know it's still the most versatile no-tillage system on the market.

And, after the crop is in, you can look to Allis-Chalmers experience to help you get it out right and on time. This year, Gleener combines will harvest over 45,000,000 acres of wheat, corn, soybeans and other crops. More custom operators are using Gleeners than any other combine. That says a lot, too.

So, when you turn to no-tillage, turn to the company that pioneered the practice. See your Allis-Chalmers dealer

**We can help you grow.**

**AGCO's rich heritage of innovations includes the development of the first commercial no-til planter (Allis Chalmers) in 1966.**

**SMART SOLUTIONS FOR SUSTAINABLE AGRICULTURE**

**YESTERDAY. TODAY. TOMORROW.**
